# Natural Sports Turf™ PROJECT

## Bethel Gospel Tabernacle Soccer Field

**Project Owner**  
*Bethel Tabernacle Church*

**Project Location**  
*Wellington Street,  
Hamilton Mountain*

## Soccer Field Installation

Greenhorizons was consulted during the initial stages of this soccer field project. The challenge was to design a regulation size soccer pitch utilizing imported material from a development site next door while minimizing earth moving requirements. Greenhorizons proposed a “push-up” design to raise the playing surface and ensure it would have positive surface drainage. Greenhorizons laid out the field within the area desired by Bethel and construction began.

**Unique Challenges** – Greenhorizons was able to “site-fit” a premier regulation sized soccer field, into the existing grade and utilizing access material from adjacent development site while minimizing impact on adjacent property.

**Results achieved** – The field layout and grade fit very well into the property and was completed on-time and on budget.

*Laser grading to ensure positive surface drainage and healthy turf.*
